DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 14 July 2005 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 4 and 6 are rejected under 35 U.S.C. 102(a) as being anticipated by admission (admitted prior art).

FIG. 3 of instant application discloses a prior art multichannel video optical transmission system comprising an optical receiver 13. The optical receiver comprises optical-electrical converting means 4, amplifier 5 and frequency demodulating means 6.

Allowable Subject Matter

4. Claims 1-3 and 5 are allowed.

Response to Arguments

5. Applicant's arguments filed 14 July 2005 have been fully considered but they are not persuasive.

Art Unit: 2633

The receiver of admitted prior art (FIG. 3) is exactly the same as claimed invention claims 4 and 6. Even though Applicant adds limitations regarding the characteristics of the pilot signal in these claims, such characteristics are generated by the transmitter, and the prior art receiver can receive the pilot signal with such characteristics as claimed in claims 4 and 6. Therefore, the receiver as claimed in claim 4 or claim 6 is not patentable.
